

From the INTERNATIONAL BUREAU

**PCT**

NOTIFICATION OF TRANSMITTAL  
OF COPIES OF TRANSLATION  
OF THE INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT  
(PCT Rule 72.2)

To:

OHSHIMA, Masataka  
Ohshima Patent Office  
Fukuya Bldg.  
3, Yotsuya 4-chome  
Shinjuku-ku, Tokyo 160-0004  
JAPON

Date of mailing (day/month/year) 23 December 2004 (23.12.2004)	
Applicant's or agent's file reference G47KASEI	<b>IMPORTANT NOTIFICATION</b>
International application No. PCT/JP2003/004457	International filing date (day/month/year) 08 April 2003 (08.04.2003)
Applicant TEIJIN CHEMICALS, LTD. et al	

**1. Transmittal of the translation to the applicant.**

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

**2. Transmittal of the copy of the translation to the elected Offices.**

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

EP

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

US

**3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).**

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

Applicant <b>TEIJIN CHEMICALS, LTD.</b>		

1. This international preliminary examination report has been prepared by this International Preliminary Examining Authority and is transmitted to the applicant according to Article 36.

2. This REPORT consists of a total of 5 sheets, including this cover sheet.

☐ This report is also accompanied by ANNEXES, i.e., sheets of the description, claims and/or drawings which have been amended and are the basis for this report and/or sheets containing rectifications made before this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions under the PCT).

These annexes consist of a total of \_\_\_\_\_ sheets.

3. This report contains indications relating to the following items:

- I ☒ Basis of the report
- II ☐ Priority
- III ☐ Non-establishment of opinion with regard to novelty, inventive step and industrial applicability
- IV ☐ Lack of unity of invention
- V ☒ Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement
- VI ☐ Certain documents cited
- VII ☐ Certain defects in the international application
- VIII ☐ Certain observations on the international application

Date of submission of the demand <b>06 June 2003 (06.06.03)</b>	Date of completion of this report <b>24 June 2003 (24.06.2003)</b>

## INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP03/04457

## I. Basis of the report

## 1. With regard to the elements of the international application:\*

- ☒ the international application as originally filed
- ☐ the description:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_
- ☐ the claims:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, as amended (together with any statement under Article 19  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_
- ☐ the drawings:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_
- ☐ the sequence listing part of the description:  
pages \_\_\_\_\_, as originally filed  
pages \_\_\_\_\_, filed with the demand  
pages \_\_\_\_\_, filed with the letter of \_\_\_\_\_

## 2. With regard to the language, all the elements marked above were available or furnished to this Authority in the language in which the international application was filed, unless otherwise indicated under this item.

These elements were available or furnished to this Authority in the following language \_\_\_\_\_ which is:

- ☐ the language of a translation furnished for the purposes of international search (under Rule 23.1(b)).
- ☐ the language of publication of the international application (under Rule 48.3(b)).
- ☐ the language of the translation furnished for the purposes of international preliminary examination (under Rule 55.2 and/or 55.3).

## 3. With regard to any nucleotide and/or amino acid sequence disclosed in the international application, the international preliminary examination was carried out on the basis of the sequence listing:

- ☐ contained in the international application in written form.
- ☐ filed together with the international application in computer readable form.
- ☐ furnished subsequently to this Authority in written form.
- ☐ furnished subsequently to this Authority in computer readable form.
- ☐ The statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.
- ☐ The statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished.

4. ☐ The amendments have resulted in the cancellation of:

- ☐ the description, pages \_\_\_\_\_
- ☐ the claims, Nos. \_\_\_\_\_
- ☐ the drawings, sheets/fig \_\_\_\_\_

5. ☐ This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed, as indicated in the Supplemental Box (Rule 70.2(c)).\*\*

\* Replacement sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to this report since they do not contain amendments (Rule 70.16 and 70.17).

\*\* Any replacement sheet containing such amendments must be referred to under item 1 and annexed to this report.

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.

PCT/JP 03/04457

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Claims	1-23	YES
	Claims		NO
Inventive step (IS)	Claims	1-23	YES
	Claims		NO
Industrial applicability (IA)	Claims	1-23	YES
	Claims		NO

### 2. Citations and explanations

Document 1: JP 2000-239513 A (Mitsubishi Engineering Plastics Corp.), 5 September 2000

#### Claims 1-8

The inventions set forth in claims 1-8 involve an inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose an optical disk substrate formed from a composition constituted by including a specified compound having two benzene rings in a polycarbonate resin, and due to this feature these inventions in the present application offer the advantageous effect that as a high density recording medium it can be copied to at high density in the form of stamper disks, and there is little warping due to changes in the environment.

#### Claim 9

Claim 9 involves an inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose an optical recording medium wherein a recording surface is set on the undulating formed surface of an optical disk substrate formed from a composition constituted by including a

specified compound having two benzene rings in a polycarbonate resin, and due to this feature this invention in the present application offers the advantageous effect that substrate as a high density recording medium it can be copied to at high density in the form of stamper disks, and there is little warping due to changes in the environment.

#### Claims 10-15

The inventions set forth in claims 10-15 do not involve an inventive step in the light of document 1, cited in the international search report.

Document 1 does not disclose a light guide formed from a composition constituted by including a specified compound having two benzene rings in a polycarbonate resin, and due to this feature these inventions in the present application offer the advantageous effect of little variation or unevenness in brightness.

#### Claim 16

The invention set forth in claim 16 involves an inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose a liquid crystal display device fitted with a backlighting light source comprising a light guide formed from a composition constituted by including a specified compound having two benzene rings in a polycarbonate resin, and due to this feature this invention in the present application offers the advantageous effect that a backlighting light source is fitted which has little variation or unevenness in brightness.

#### Claims 17-22

The inventions set forth in claims 17-22 involve an

inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose a resin composition constituted by including a specified compound having two benzene rings in a polycarbonate resin, and due to this feature these inventions in the present application offer the advantageous effect that as a high density recording medium it can be copied to at high density in the form of stamper disks, and there is little warping due to changes in the environment or variation or unevenness in brightness.

#### Claim 23

The invention set forth in claim 23 involves an inventive step relative to document 1, cited in the international search report.

Document 1 does not disclose moulded products formed from a resin composition constituted by including a specified compound having two benzene rings in a polycarbonate resin, and due to this feature this invention in the present application offers the advantageous effect that as a high density recording medium it can be copied to at high density in the form of stamper disks and there is little warping due to changes in the environment or variation or unevenness in brightness.
